Aeronautical Charts:

Little known facts

By: Richard Neher, National Aeronautical Charting Office

Aeronautical charts and publications contain a wealth of information. Some of that information has never been taught, or has been taught and quickly forgotten. Understanding chart information can save time, money, frustration, and sometimes lives. This seminar covers aeronautical chart symbols, airspace depiction, and provides pilots an opportunity to ask questions and comment on charts.

This is one seminar you should NOT miss!

Important Notice: Your attendance at this Safety Seminar fulfills one of the requirements towards the Pilot Proficiency Awards Program as outlined in Advisory Circular 61.91H.
